DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kunio (JP-53015502).

Regarding claim 7, Kunio discloses (see figs 1-6) a method of manufacturing an electric rotating machine, the machine having a middle core (1) comprising plural plates stacked in an axial direction, an outer core (4) disposed outside the middle core which rotates relative to the middle core, and an inner core (3) disposed inside the middle core which rotates relative to the middle core, and the method comprising: joining the plural plates to a first fixing member (2) by a connecting member (13), and finishing the inner and outer circumferential surfaces of the plural plates (see abstract) in the state where the plural plates are joined only to the first fixing member.

Regarding claim 8, Kunio discloses joining the opposite side of the plural plates to the first fixing member, to a second fixing member after finishing.

Regarding claim 9, Kunio discloses the connecting member is a bolt, a hole through which the bolt passes is formed in the plural plates, and the plural plates are joined to the first fixing member by passing the bolt through the hole.
